EXPERIENCE

Front End developer – Intern

Oreyeon

May 2023 – Present, Beirut

- Building an internal tool for the organization.
- Utilized the new next 13 app router with server components and actions, and implemented typescript and Zod to ensure full type safety across the whole project.
- I also used react query for some use cases that aren't covered yet with server components and actions.
- Used tailwind and Shadcn for styling and UI.
- Subject to NDA, can't provide more info about the project.

Full Stack Developer Intern

Ajjerni

October 2022 – January 2023, Remote

- Contributed to the growth and development of the rental website platform.
- Fixed various bugs across the frontend and backend.
- Added and edited various components throughout the frontend.
- Introduced a new insurance fee feature to the pricing system.
- Optimized authorization process to align with introduced features, implemented ID verification system for users to complete the rental process securely, and introduced a new insurance fee feature to the pricing system.
- We used Next, typescript, react query and tailwind for the frontend, and Strapi, a Node.js framework, for the backend.

Full Stack Developer Intern

Fattal Group

May 2022 – July 2022, Beirut

- Modernized and turned their outdated desktop application for salesforce operations into a web application using cutting-edge technologies.
- Implemented an authentication and authorization system.
- Used Vue.js with Vuex for the backend, and .NET Api Core for the backend.
- Developed an admin panel for all the operations across multiple companies under Fattal Group.
- Had the chance to work with multiple departments and gained valuable insights into the operations of a large company.

Frontend Developer

EXMNA

August 2021 – April 2022, Remote

- Transitioned the website from Wordpress to Nuxt.js.
- Implemented various Figma designs.
- Acquired strong frontend and JavaScript fundamentals during my time there.

PROJECTS

Code Racer

Open Source Project

- An open source project built with Next.js, Tailwind CSS, and TypeScript.
- Actively contributing to the project, either by implementing new features, or by fixing various bugs.
- Continually refactoring code and optimize it.
- Help and guide beginners on how to contribute to open source, either by explaining how to work with git and github, or by helping them code and open their first pull request.

EDUCATION

Bachelor in Computer Science

Lebanese University • Faculty of Science, Fanar • 2022
